It does not constitute investment advice, or an offer to sell, or a solicitation of an offer to buy any security, investment product or service. Informational sources are considered reliable but you should conduct your own verification of information contained herein. Investment involves risk. The value of the units in the funds and the income accruing to the units, if any, may fall or rise. Investments in funds are not deposits and are not considered as being comparable to deposits.

Past performance is not indicative of future performance and investors may not get back the full or any part of the amount invested. Positive distribution yield does not imply positive return. Dividend is not guaranteed. Dividend may be paid out of capital, subject to the fund manager's discretion. Payment of dividends from capital may result in a decrease in the net asset value. All or part of the Fund's fees and expenses may be charged to the capital of the Fund which will result in income being increased for distribution, however, the capital that the Fund has available for investment in the future and capital growth may be reduced. Fund's net asset value may likely have high volatility due to its investment policies or portfolio management techniques. Funds which are invested in emerging markets, smaller companies and financial derivative instruments may also involve higher risks and are usually more sensitive to price movements. Any applicable currency hedging process may not give a precise hedge and there is no guarantee that any hedging will be successful. Investors in a currency hedged fund or share class may have exposure to currencies other than the currency of their fund or share class. Investors should make their own investigation or evaluation or seek independent advice prior to making any investment.
